

VOLCANO PARK KEMENES

What you must definitely see!

EXPECTED OPENING – AUTUMN 2012.

SÁG-MOUNTAIN, the mountain of volcanic origin rises on the border of the town as a rarity relating to the history of the earth and of a great geological importance. A significant amount of the basalt cap of the circumdenudation was quarried, as a result of that a wonderful natural spectacle: the **CRATER** remained after it. Thanks to this we can get an inside view of the interior mountain, and we also can get acquainted with its emergence.

The local government gained a subsidy of 430 Million Ft through tender for the establishment of **VOLCANO PARK KEMENES**.

The parts of the large-scale investment:

- * The **VOLCANO HOUSE** planned to the foot of mountain. With its 11 rooms, an interactive exhibitory will serve the fastidious entertainment and popular science in the building.
 - * Visitors dropping into **VERNE-CABIN** can make a virtual trip into the interior of the earth.
 - * The **MAGMA-CHAMBER** brings you – with the aid of large flatmonitors – directly into the center of the magmabody.
 - * In the **VOLCANO-GALLERY** there are different eruptions generated by a simulator software.
 - * In the **VOLCANO-HORRORROOM** the visitors can learn the destroying activity of a volcano. Standing on a special platform they can be participants in an imitated earthquake.
 - * In the **VOLCANO-THEATRE** you can experience the spectacle of an eruption.
 - * The **EXPLORATORY-ROOM** is the scene of an independent playing opportunity. The visitors can build here volcanos, take stones and minerals in their hands, have a look into the microscope, and see what is inside a stone.
 - * Further part of the project is the renovation of the **MUSEUMBUILDING** standing on Ság-mountain, where the archeological finds - revealed during querring - will be exhibited.
 - * In the **STONEPARK** – located around the building – children can learn with the help of a tectonic megapuzzle and rotatable boards.
 - * You can improve your knowledge in the **PLAYGARDEN**.
 - * After visiting the park, you can range the renewable **GEOLOGICAL INSTRUCTING PATH** of the landscape-protection area, which has 12 stops along the 400 m path.
- Finally you can have mid-afternoon snack at the foot of the **MEMORIAL CROSS OF TRIANON**, try the mountain's „**KIDNEYWASHING**” **WINE** in the cellars, relax at the nearby **VOLCANO SPA AND WELLNESS**, or take a view of the **MÁRIA ECCLESIASTICAL CHURCH** in the renovated towncentre.
